

**Questions for examination test in dermatology
for foreign 4-th year study students of the stomatological faculty for 2024-2025 years.**

1. Structure of epidermis.
2. Structure of dermis and hypodermis.
3. Structure of mucous membranes of oral cavity and lips.
4. Functions of skin (preventive, immunologic, respiratory, sensory, metabolic, resorptive, thermoregulative).
5. Circulatory system of skin.
6. Primary morphological elements: macule, papule, urtica, bulla, tubercule, node, vesicle, pustule.
7. Secondary morphological elements: lichenification, scar, excoriation, scale, erosion, ulcer, vegetation.
8. Polymorphism (true and false).
9. Dermatological tests (lichen rubber planus, lupus erythematosus, acantholytic pemphigus).
10. Etiology, pathogenesis of pyoderma.
11. Folliculitis, ostiofolliculitis: clinical features, treatment, prophylactic.
12. Furuncles: etiology, pathogenesis, clinical features, treatment, prophylactic.
13. Hidradenitis: etiology, pathogenesis, clinical features, treatment, prophylactic.
14. Streptococcal impetigo: clinical features, treatment, prophylactic.
15. Scabies: etiology, epidemiology, clinical features, treatment, prophylactic.
16. Pediculosis: etiology, epidemiology, clinical features, treatment, prophylactic.
17. Microsporia: etiology, epidemiology, clinical features, diagnosis, treatment, prophylactic.
18. Candidiasis of the skin: mycosal candidiasis etiology, epidemiology, clinical features, diagnosis, treatment, prophylactic.
19. Onychomycosis: etiology, epidemiology, clinical features, diagnosis, treatment, prophylactic.
20. Mycosis of feet: etiology, epidemiology, clinical features, diagnosis, treatment, prophylactic.
21. Dermatitis, its varieties, clinical features, treatment.
22. True eczema: etiopathogenesis, clinical features, treatment.
23. Microbial eczema: etiopathogenesis, clinical features, treatment.
24. Atopic dermatitis: etiopathogenesis, clinical features, treatment.
25. Toxicodermia: etiopathogenesis, clinical features, treatment.
26. Urticaria: etiopathogenesis, clinical features, treatment.
27. Quincke's edema: etiopathogenesis, clinical features, treatment.
28. Lupus vulgaris: etiology, pathogenesis, clinical features, diagnosis, treatment.
29. Scrofuloderma: etiology, pathogenesis, clinical features, diagnosis, treatment.
30. Tuberculosis papulonecrotica: etiology, pathogenesis, clinical features, diagnosis, treatment.
31. Scleroderma: etiopathogenesis, clinical features, diagnosis, treatment.
32. Lupus erythematosus: etiopathogenesis, clinical features, diagnosis, treatment.
33. Acne vulgaris: etiopathogenesis, clinical features, diagnosis, treatment.
34. Lichen rubber planus: etiopathogenesis, clinical features on mucous membranes of oral cavity and skin, treatment.
35. Acantholytic pemphigus: etiopathogenesis, clinical features on mucous membranes of oral cavity and skin, diagnosis, treatment.
36. Erythema multiforme: etiopathogenesis, clinical features on mucous membranes of oral cavity and skin, diagnosis, treatment.
37. Herpes simplex: etiology, epidemiology, clinical features, treatment, prophylactic.
38. General course of syphilis.
39. Etiology, morphological and biological properties of Treponema pallidum.
40. Immunity when infected, reinfection, superinfection.
41. Incubation period, causes which influence upon duration.
42. Ways and methods of finding out patients with syphilis.
43. Ways and conditions of infection syphilis.
44. Primary syphilis, general development, clinical features.
45. Clinical characteristics of typical of hard chancre, differential diagnosis.

46. Varieties of hard chancre.
47. Atypical form of hard chancre.
48. Complications of hard chancre.
49. Clinical peculiarities of regional scleradenitis, polyadenitis.
50. Common description of the secondary syphilis.
51. Syphilitic roseola, clinical features, differential diagnosis.
52. Rashes on mucous membranes in the secondary syphilis.
53. Papular syphilid, clinical features, differential diagnosis.
54. Syphilitic leukoderma, clinical features, differential diagnosis.
55. Syphilitic alopecia, clinical features, differential diagnosis.
56. General development of tertiary syphilis.
57. Clinical characteristics of tuberculous syphilid of skin, its varieties, complications, outcome, differential diagnosis.
58. Clinical characteristics of gummatous syphilid of skin, its varieties, complications, outcome, differential diagnosis.
59. Syphilis of placenta and fetus.
60. Clinical features of early congenital syphilis (skin rashes, rhinitis, osteochondritis, damages of internal organs).
61. Clinical features of late congenital syphilis (unconditional attributes).
62. Clinical features of late congenital syphilis (relative attributes, dystrophies).
63. Principles of diagnosis of syphilis.
64. Treatment, types of treatment.
65. Drugs used for the treatment.
66. Prophylaxis of syphilis (individual and mass).
67. Gonorrhoea in males: etiology, epidemiology, clinical features, diagnosis, treatment, prophylactic.
68. Trichomoniasis: etiology, epidemiology, clinical features, diagnosis, treatment, prophylactic.
69. Chlamydial infection: etiology, epidemiology, clinical features, diagnosis, treatment, prophylactic.
70. Bacterial vaginosis: etiology, epidemiology, clinical features, diagnosis, treatment, prophylactic.

Headmaster of the dept. Dermatovenerology
and Laboratory Diagnostics
20.01.2025

Zhiltsova E.E.
